Learning tool for biodiversity conservation activities: Let's Try Biodiversity (LTB)

The Biodiversity WG developed a learning tool for biodiversity conservation activities "Let's Try Biodiversity (LTB)" on April 2018. LTB is a first comprehensive guidance for business sectors to start biodiversity conservation activities easily, and providing quick references to find activities by capability or interests of each company. We hope that LTB will help much more companies to start those activities.

Contents: "Surveying biodiversity", "Maintaining habitable environments for creatures", "Protecting ecosystems", "Effective use of goods and locations", "Connection with local communities", "Biodiversity conservation activities through business operations", "Learning about biodiversity"

"MY Declaration" to conserve Biodiversity

A number of living things interacting with each other... we call it Biodiversity.

Feeling the connection with living things in daily life is such an important thing for us to conserve Biodiversity.

We all owe our daily lives to natural resources such as water, air, food, fabric, wood and medicine.

Choose what you can do from the following actions and make them your own "MY Declaration"

Let's give out your "MY Declaration" and move into action from today so that we will be able to continuously receive blessings of Biodiversity!

Act 1  Eat I enjoy locally produced food in season.

Act 2  Feel I go out in the nature, visit zoo and botanical gardens to feel it through my five senses.

Act 3  Show I express my feelings for wonder of nature with photos, paintings, writing and any way I can.

Act 4  Conserve I join the activities for conserving harmony among living things and its connection with humans and cultures.

Act 5  Select I buy green products.

CEPA JAPAN: c/o Eco Future Fund, 3F, CTN Bldg. 2-2-5 Kanda Suda, Chiyoda,
